RECOMMENDATIONS AND CAUTIONS

- A606-4 and Bare Steel performs best in environments with low humidity
- Load calculations and load tables DO NOT APPLY TO ANY A606 OR BARE STEEL PRODUCT.
- A606-4 should not be used with dissimilar metals other than stainless steel. This will decrease the lifespan of the product.
- Screws and clips for A606-4/Corten MUST be stainless steel. Screw head will be painted brown.
- Underlayment should be a HIGH TEMPERATURE UNDERLAYMENT.
- Not recommended near salt spray environments and frequent rain locations as it will shorten the life expectancy of the products.
- Acid washing will degrade steel performance.
- Rust runoff will likely stain the surrounding surfaces.
